**Excel Models for Business and Operations Management** - John Barlow
2005-06-17 Excel Models for Business and Operations Management, Second Edition, adopts a structured approach to management decision-making by integrating the activities of a manufacturing organization. The text is entirely assignment-based and uses Microsoft’s Excel software to develop over eighty models. Everyday examples from finance, marketing and operations management form the basis of the book’s ‘hands-on’ development models. As in the previous edition, the emphasis is on the practical implementation of real-world models rather than traditional theoretical concepts. The book’s learn-by-example approach helps to develop both analytical and mathematical skills by focusing on the formulation and building of business models. New features in the second edition include Finance models in a new chapter on investment analysis models Job sequencing including a VBA routine for Johnson’s Rule Multiplicative Holt-Winter’s model All models and reference notes updated to the latest version of Excel Excel Models for Business and Operations Management is ideally suited to intermediate and advanced undergraduate courses, as well as MBA courses, in business studies, finance, accounting, information technology, and operations management. It should be of interest to managers and analysts who want to develop their model-building skills.

**Communications** - James Carberry 2017-05-15
Improving communication is one of the most important - and challenging - issues that management accountants face. In a global survey of CFOs, Ernst & Young said: "Despite two thirds of respondents saying that increasingly they act as the public face of the organization, most point to communication and influencing as the most important area for improvement." In this publication you will learn:
How do management accountants know if they are effectively communicating?
What are the most effective techniques for improving their communication skills? This book is specifically designed to meet the needs and interests of management accountants. It draws on interviews with finance professionals at every level of corporate accounting, as well as with communication consultants, executive recruiters and educators. It looks at how management accountants communicate inside and outside their organizations, identifies best practices, and gives hands-on strategies that accountants can use right away. Readers will discover how to: Move their current communication skills to a higher level. Recognize the importance of communication within the context of their financial manager function. Understand the right way to deliver bad news and resolve conflicts. Manage the impact of new technologies on traditional communication channels. Develop the skills to use active listening as the foundation for positive communication tactics.
