How the Communist Party of China Manages the Issue of Nationality-Shiyuan Hao 2015-11-30 This book introduces the background of China’s issue of nationality from the very beginning. Throughout the country’s history, all the nationalities that lived and prospered on Chinese land created a pattern of cultural diversity within national unity through their interaction and integration. The formation of this pattern is due not only to the geographical fact that China covers a broad expanse on the Asian continent but also to the historical fact that it is home to disparate and ancient human heritages, and to culturally diverse historical sources. The book's five chapters explain the evolution of the CPC’s policy towards nationalities. At the time of the PRC’s founding, the Common Program (in essence an interim Constitution) passed by the Chinese People’s Political Consultative Congress (which was composed of people from all sectors of society and all of China’s nationalities) not only declared that people of all China’s nationalities had equal rights, but also stipulated that: regional national autonomy would be practiced in all areas where minority nationalities were concentrated; that all nationalities had the right to develop their own languages and cultures to maintain or reform their customs and religious beliefs; and also mandated that people’s governments support the development of minority nationalities in the areas of politics, the economy, culture and education. In the final section, the book demonstrates that the subject of how the CPC addresses nationality-related issues is a dynamic one that evolved throughout the past and future, and is simultaneously an answer, a process and a question.

Language Power and Hierarchy-Linda Tsung 2014-10-27 Shunning polemicism and fashioning a new agenda for a critically informed yet practically orientated approach, this book explores aspects of multilingual education in the People’s Republic of China (PRC). Amongst other issues, it also looks at the challenges associated with bilingual and trilingual education in Xinjiang and Tibet as well as the mediation between religion and culture in multi-ethnic schools, covering these issues from a range of perspectives - Korean, Uyghur, Tibetan, Mongolian and Yi. The PRC promotes itself as a harmonious, stable multicultural mosaic, with over 50 distinct ethnic groups striving for common prosperity. Beneath this rhetoric, there is also inter-ethnic discord, with scenes of ethnic violence in Lhasa and Urumqi over the last few years. China has a complex system of multilingual education - with dual-pathway curricula, bilingual and trilingual instruction, specialised ethnic schools. This education system is a lynchpin in the Communist party state’s efforts to keep a lid on simmering tensions and transform a rhetoric of harmony into a critical pluralistic harmonious multiculturalism. This book examines this supposed lynchpin.

Spoiling Tibet-Gabriel Lafitte 2013-09-12 The mineral-rich mountains of Tibet so far have been largely untouched by China’s growing economy. Nor has Beijing been able to settle Tibet with politically reliable peasant Chinese. That is all about to change as China’s 12th Five-Year Plan, from 2011 to 2015, calls for massive investment in copper, gold, silver, chromium and lithium mining in the region, with devastating environmental and social outcomes. Despite growing interest in Tibet worldwide, Spoiling Tibet is the first book that investigates mining at the roof of the world. A unique, authoritative guide through the torrent of online posts, official propaganda and exile speculation.

Introduction to the History of Indian Buddhism-Eugène Burnouf 2010-02-15 The most influential work on Buddhism to be published in the nineteenth century, Introduction à l’histoire du Bouddhisme indien, by the great French scholar of Sanskrit Eugène Burnouf, set the course for the academic study of Buddhism—and Indian Buddhism in particular—for the next hundred years. First published in 1844, the masterwork was read by some of the most important thinkers of the time, including Schopenhauer and Nietzsche in Germany and Emerson and Thoreau in America. Katia Buffetrille and Donald S. Lopez Jr.’s expert English translation, Introduction to the History of Indian Buddhism, provides a clear view of how the religion was understood in the early decades of the nineteenth century. Burnouf was an impeccable scholar, and his vision, especially of the Buddha, continues to profoundly shape our modern understanding of Buddhism. In reintroducing Burnouf to a new generation of Buddhologists, Buffetrille and Lopez have revived a seminal text in the history of Orientalism.

Contemporary Tibet-Barry Sautman 2017-03-02 The subject of Tibet is highly controversial, and Tibet, as a political entity, is defined differently from source to source and audience to audience. The editors of this path-breaking, multidisciplinary study have gathered some of the leading scholars in Tibetan and ethnic studies to provide a comprehensive analysis of the Tibet question. "Contemporary Tibet" explores essential themes and issues concerning modern Tibet. It presents fresh material from various political viewpoints and data from original surveys and field research. The contributors consider such topics as representations and sovereignty, economic development and political conditions, the exile movement and human rights, historical legacies and international politics, identity issues and the local society. The individual chapters provide historical background as well as a general framework to examine Tibet's present situation in world politics, the relationship with China and the West, and prospects for the future.

History As Propaganda-John Powers 2004-10-14 Despite Chinese efforts to stop foreign countries from granting him visas, the Dalai Lama has become one of the most recognizable and best loved people on the planet, drawing enormous crowds wherever he goes. By contrast, China's charismatically-challenged leaders attract crowds of protestors waving Tibetan flags and shouting "Free Tibet!" whenever they visit foreign countries. By now most Westerners probably think they understand the political situation in Tibet. But, John Powers argues, most Western scholars of Tibet evince a bias in favor of one side or the other in this continuing struggle. Some of the most emotionally charged rhetoric, says Powers, is found in studies of Tibetan history. narratives.

Authenticating Ethnic Tourism-Philip Feifan Xie 2011 This book represents a shifting of emphasis away from the discourse of authenticity to the process of authenticating ethnic tourism. It focuses upon what authentication is, how it works, who is involved, and what the problems are in the process. By using the study of folk villages on Hainan Island, China, the book suggests that authenticity evolves from a static into a more dynamic concept, which can be formulated according to the different stages of development relating to all the stakeholders involved. Authentication is an interactive process in which a balance of forces defines a state of equilibrium. The book uncovers some interesting findings that will significantly contribute to the literature on ethnic tourism in developing areas. "Finally, here is a way to move beyond old debates about authenticity in tourism studies, with a pragmatic, useful approach for analyzing 'authentification' processes. Xie's models of stakeholders' interactions and the paradoxes encountered in ethnic tourism development have worldwide application for academics and stakeholders themselves."Margaret Swain, University of California, USA
